

INSURANCE APPLICATION

Underwriting & Risk Assessment — New Business Application

Application ID:	IA157
Applicant:	Sanjay Lindqvist
Requested Coverage:	Auto
Date of Submission:	April 23, 2025
Status:	In Review

Applicant Summary

The applicant is seeking auto coverage following the non-renewal of a prior policy. The application discloses two at-fault claims within the past three years, and the automated risk model has flagged a prior-claims-history factor significantly above the standard threshold.

Underwriter's Note

Given the elevated prior-claims-history signal, this file has been queued for manual review before any rate can be offered. A prior-carrier loss run has been requested to confirm the claims details disclosed on the application.

Applicant Declaration

"My previous insurer non-renewed my policy after two claims — one for a minor parking-lot collision, one for hail damage. Neither was my fault in the sense of reckless driving. I understand this may affect my rate."
