

CUSTOMER COMMUNICATION LOG

Prepared by Customer Servicing Team — Ref. Policyholder Aisha Kobayashi

Policyholder:	Aisha Kobayashi
Policy ID:	POL241
Call Date:	December 6, 2025
Handled By:	Miguel Lindqvist, General Servicing

Call Summary

Policyholder called to ask about her upcoming renewal premium after receiving an informal estimate from a previous call. She stated that a representative had told her the increase would be “around 5%, maybe a bit more” based on her clean claims history.

The representative handling this call confirmed the policyholder's account showed no claims in the review period, but explained that the actual proposed increase reflects a broader regional rate adjustment rather than an individual risk factor, and is larger than the estimate she had previously been given.

Policyholder requested written documentation of the renewal terms before deciding whether to proceed, which prompted the open Policy Document Request on file.

Servicing Notes

The proposed increase of approximately 13% is notably larger than the 5% figure the policyholder recalls being told. This gap is worth confirming before the renewal is finalized, since it directly affects whether the policyholder feels the increase was accurately communicated.
